GP Specialists to Sweden

We are looking for skilled medical doctors specialized in General practice. You need to have completed your specialization. At the moment we have several positions open.

This employer will start up a new project for foreign GP-doctors. It will be a new family center where you and your colleagues together with the project leaders specially recruited for this project and specialist GP-doctors will work for developing your skills as a GP even more. As we know, Sweden is highly developed and puts a high responsibility on the GP- specialists. Almost all of the doctors coming from other EU-countries need to take extra courses and have to be prepared to develop even more within the specialty in order to be successful. Here you get the chance. So, when you come to this new center, you need to be prepared to start working and learning. This means that you even need to have the Swedish in place in order to work in your new city and country. It is a program for a longer period, so you need to be determined and to want this. We will work with you and your family throughout the entire recruitment process. We aid in applying for the approval as a medical specialist in Sweden, relocation, housing, language training and other practical issues such as kindergarten, school and naturally – helping and job-coaching for your partner.

We see that you are interested in working in a health center with a high preparation level where you are expected to treat most of the patients coming to you. If you have double specialization but would like to work as a GP you have an advantage. These offers are for permanent positions in the middle and southern part of Sweden.
