Child and Adolescent Psychiatrist, Norway

We are recruiting an experienced specialist for a permanent position at a public hospital in Northern Norway.

This is an opportunity to become part of the Norwegian public healthcare system, work with children and young people facing a range of mental health challenges, and develop your career in a region known for its spectacular nature and excellent quality of life.

About the position:
As a child and adolescent psychiatrist, you will contribute to the assessment, diagnosis, treatment and follow-up of children and adolescents with psychiatric conditions. You will work in collaboration with other healthcare professionals, helping to provide comprehensive and individualised care for young patients and their families.

Your responsibilities will include:
Assessment, diagnosis and treatment of children and adolescents with psychiatric disorders
Medical evaluations and management of psychiatric medication
Follow-up of patients with complex mental health conditions
Development and evaluation of individual treatment plans
Collaboration with psychologists, doctors and other healthcare professionals
Involvement of parents and caregivers in assessment and treatment where appropriate
Cooperation with schools, primary healthcare services and other relevant agencies
Supervision of resident doctors where relevant
Contribution to clinical development and quality improvement

Qualifications:
Medical licence and specialist qualification in child and adolescent psychiatry from an EU/EEA country
Clinical experience in child and adolescent mental health services
Good English communication skills and motivation to learn Norwegian
Willingness to reach Norwegian language proficiency at B2 level before starting work
Ability to work independently and collaborate effectively in a multidisciplinary team
Strong communication skills and an empathetic approach to children, adolescents and their families

What can you expect?
A permanent position within the Norwegian public healthcare system

A varied and meaningful clinical role within child and adolescent psychiatry
Opportunities for professional development
Collaboration with colleagues from different healthcare disciplines
Salary and employment conditions in accordance with applicable agreements
The opportunity to build a long-term career and life in Norway

Life in Northern Norway:
Northern Norway offers a unique combination of spectacular nature, welcoming communities and a more relaxed pace of life. With dramatic mountains, beautiful fjords and vast open landscapes, the region provides plenty of opportunities to enjoy the outdoors.

During summer, the midnight sun brings long, bright days, while winter offers the chance to experience the northern lights, snow-covered landscapes and activities such as skiing and hiking.

The region also offers opportunities for families, with schools, kindergartens and recreational activities. Whether you enjoy outdoor adventures or a quieter lifestyle close to nature, Northern Norway has much to offer.

As a candidate, you will receive:
Free online Norwegian language training with a private tutor, including medical Norwegian, to help you reach B2 level
Guidance through the Norwegian medical authorisation and specialist recognition processes
Personal follow-up throughout the recruitment process
Practical guidance on relocation, housing and settling in Norway
Support and information for family members who may be relocating with you
