

Consultant Interventional Radiology, Abu Dhabi, the UAE

To be successful as a Radiologist you must be able to use medical imaging technologies, such as X-rays, CT scans, ultrasounds, and MRIs, and successfully execute and interpret the medical images in order to aid the diagnostic and treatment process.

Responsibilities:

Evaluating patients' medical histories to ensure the various medical imaging procedures will not harm them.

Suggest alternative medical imaging techniques, when necessary. Informing patients about the medical imaging process.

Using devices such as computer tomography (CT) scanners and magnetic resonance imaging (MRI) machines.

Performing or directing radiology staff to carry out image-guided, diagnostic procedures.

Working with radiology lab technicians to perfect image quality.

Interpreting the results from diagnostic imaging procedures to determine diagnoses.

Communicating and discussing results and diagnoses with physicians.

Compiling written reports of results and diagnoses.

Following medical protocols for resuscitation, bleeding, infection, or other emergency situations, when necessary.

Working Time is Full Time.

Salary is AED 25K TO AED 90K (GP, Specialist, Consultant). Benefits are Good Monthly Salary + Incentives + Standard family benefits like accommodation, Air ticket, Medical insurance, and Education allowance.
