

## **Forensic Consultant Psychiatrist, Ireland**

*Location:* Kildare

*Salary:* negotiable

We are seeking a Consultant Forensic Psychiatrist to provide specialist assessment, treatment, and risk management for individuals with complex mental health and forensic needs in community-based settings.

### *Role Overview:*

This role involves delivering high-quality, person-centred psychiatric care, working as part of a multidisciplinary team to support individuals with forensic histories, mental illness, and complex behavioural presentations.

### *Key Responsibilities:*

Conduct forensic psychiatric assessments, risk formulation, and management planning

Provide expert clinical input on complex cases, including dual diagnosis and behavioural needs

Collaborate with multidisciplinary teams across mental health and disability services

Support clinical governance, quality assurance, and regulatory compliance

Contribute to maintaining standards aligned with national regulatory bodies

Provide cover for consultant colleagues as required

### *Requirements:*

Specialist registration with the Irish Medical Council (or eligibility)

Proven experience in forensic psychiatry

Strong skills in risk assessment and biopsychosocial formulation

Experience working with complex mental health and/or intellectual disability populations

Excellent communication, decision-making, and teamwork abilities

### *Desirable:*

Experience across forensic and intellectual disability services

Involvement in research, audit, or medical education

### *What's on Offer:*

Competitive salary and benefits package

Support for ongoing professional development

Opportunity to work in a collaborative, multidisciplinary environment

Exposure to diverse and complex clinical cases

### *To Apply:*
