Hepatologist with Transplant Expertise, Sweden

We are currently seeking a hepatologist with at least five years of experience as a specialist physician to join a highly specialised team at one of Sweden's leading university-affiliated hospitals. This opportunity offers the chance to work with complex liver disease, transplantation medicine, and tertiary-level care in a modern and research-oriented environment.

About the department:
The department is one of the largest and most specialized units within gastroenterology and hepatology in the Nordic region. It provides both emergency and elective care and works closely with several highly specialized disciplines.

You will become part of an international team of approximately ten specialist physicians with diverse professional backgrounds and areas of expertise. Collaboration, knowledge sharing, and continuous development are central to the department's culture.

The unit manages a broad spectrum of hepatology cases, including advanced liver disease and liver transplantation, while maintaining a strong focus on clinical excellence, education, and research.

Your role:
As a specialist in gastroenterology and hepatology, you will:
Assess, diagnose, and treat patients with complex liver diseases
Participate in both outpatient and inpatient hepatology care
Work closely with multidisciplinary teams involved in advanced liver treatment and transplantation
Contribute to teaching and supervision of junior colleagues and medical students
Participate in quality improvement initiatives and departmental development
Take part in on-call duties together with experienced colleagues

Qualifications:
We are looking for a candidate who has:
EU-recognised specialist certification in Gastroenterology and Hepatology
At least five years of experience working as a specialist physician
Experience in hepatology and management of advanced liver diseases
Experience related to liver transplantation
Strong communication skills in English and a willingness to learn Swedish
The ability to work both independently and collaboratively in a multidisciplinary environment
Research experience, academic involvement, or a PhD is considered an advantage.

The region offers:
Easy access to coastlines, nature, and outdoor activities
A vibrant cultural scene and excellent public services
International connections and modern infrastructure
A safe and family-friendly environment
Excellent opportunities for long-term professional development
You will work in a progressive healthcare setting where innovation, education, research, and high-quality patient care are closely integrated.

We offer:
Ongoing support from a recruiter before, during, and after your employment
Assistance with obtaining Swedish authorisation and specialist approvals
Help with relocation, accommodation, and support for your family if needed
Access to a free language course with a private tutor via Teams/Skype.
