

Specialist in Geriatrics, Sweden

Torsby Hospital is the county's northernmost emergency hospital with 24-hour operations in fresh, modern premises. The hospital is clinic-free and flow-oriented, based on the patient's needs. We work based on the vision "to create a hospital where we ourselves can imagine being patients."

Activities are conducted in medicine, surgery, orthopaedics, urology, gynaecology, anaesthesia, intensive care, radiology, laboratory, physiotherapy, occupational therapy, and palliative care. The surgical operations include both orthopaedics and surgery, including endoscopic operations. There is also a dialysis department.

Torsby offers a unique combination of small-town charm with comprehensive hospital services, providing excellent opportunities for meaningful geriatric care in a supportive, collaborative environment.
