

Clinical Pathologists to Clinics in Sweden (South of Sweden, Stockholm and Uppsala)

We are closely cooperating with an excellent organization within clinical pathology, based within the academic sphere with positions both directly in the University clinic where you have excellent possibilities to work within your preferred subspecialisation or in the smaller but broader county clinic. Within both types of clinics you have excellent career possibilities and you will work with equipment and competence that are truly state of the art. Further working conditions in Sweden are very generous so that you are able to combine an interesting career with family life and a rich spare time.

Currently we are looking for persons who are interested in Dermatopathology and also persons with the broader, general pathological profile, preferably also with competence and experience within cytology. If you have any other preferred subspecialisations we would be very happy to get in contact with you since we have a broad range of clients and types of clinics that we are cooperating with.

Requirements:

MD/Specialist's qualification obtained within the EU
Min. 2-3 years of relevant experience

We will of course help you with coordinating and arranging language training and be of assistance when it comes to the entire relocation process.

Please contact us unconditionally in order to have some more information about your opportunities!

*To apply: please send your CV (and any other files)
mentioning reference code DM-09 at info@phd-jobs.net*
