Department of Infection Prevention and Control:

This is a corporate department that oversees and collaborates with other Infection Prevention and Control departments of the Western and Eastern Regions focusing on public health, hospital infection control and environmental and occupational health and safety.

The department has a strong goal of providing safe and healthy environment for patients, staff, visitors, and residents and has a wide international and regional network serving as the headquarters for many organisations including the World Health Organisation Centre, Gulf Cooperation Council Centre for Infection Control and Association for Professionals of Infection Control.

Further information about the department will be discussed during an interview with the hospital.
