

Radiologist to Denmark

The radiology department in the Central Region Denmark offers positions for specialist doctors in radiology.

The Radiology Department has facilities at The Regional Hospital Viborg and at The Regional Hospital Skive. The department performs yearly more than 112,000 X-rays and scans, such as: conventional X-ray, mammography, angiography, ultrasound, CT and MR scanning and interventions (biopsy, drainage, stent installations, etc.) and about 10,000 mamma screening. The department uses the X-ray information system (RIS), digital storage of image diagnostic surveys (PACS) and digital dictation.

Radiology Department Viborg

The department in Viborg is the largest department in the region with all study and treatment types and with full emergency cover (24/7). We employ the highest number of radiologists in the region, and we are a training center for future radiology specialists, radiographers and X-ray nurses. We offer modern facilities for the imaging diagnostic (radiological) department with predominantly flat-panel conventional X-ray, all round solid-state, angiography / intervention, 4 ultrasound scanners, 3 multi-slice CT scanners and 2 1.5 T MR scanners.

Mammography (Viborg)

The mammography unit together with the Mamma Surgery Outpatient Department, form one physical unit, the breast clinic located in Viborg on the same floor as X-ray and Scanning Viborg. There is a close collaboration between radiologists, surgeons, oncologists and pathologists around patients referring to suspicion of breast cancer.

Hospitalsenheden Midt

Under the name Hospital Centre, the Regional Hospitals Viborg, Silkeborg, Skive and Hammel Neuro Center were assembled in 2011 in one organization with joint hospital management. The four regional hospitals in the hospital unit employ together approx. 4,300 employees and annually treat more than 372,000 outpatients and more than 45,000 inpatients.
