

Specialist Orthopaedics to Sweden

About the hospital: The hospital provides continuous development opportunities through courses and internships in other hospitals in order to continuously contribute to the high level of competence and updated knowledge in the field. Due to the fact that the hospital operates in an autonomous region, it is not covered by the DRG system in its conventional sense – the patient who needs care, receives it and there is room to hold the patient a little longer if needed.

Are you the one we are looking for?

- You are a specialist in orthopaedic surgery, preferably with more than four years of specialist experience with spine surgery/back competence
- You wish to work with highly competent colleagues
- You can make spine surgery assessments, and you feel comfortable dealing with general trauma

The place is a dream for those who would love to live close to the nature. You can find top class schools and excellent childcare.

To Apply:

Please send your CV mentioning reference DM-58 at info@phd-jobs.net
