Specialist psychiatry, Sweden

This is a great opportunity for someone who wants to work in a stable, supportive environment while still having the possibility to influence and develop the way care is delivered.

About the role:
You will work with a combination of inpatient and outpatient psychiatry, with flexibility depending on your experience and interests.

In inpatient care, the focus is on patients requiring 24/7 treatment, including acute conditions. You will be involved in assessment, treatment planning, medication, and discharge planning together with the team.

In outpatient care, you will be part of a multidisciplinary clinic organised into specialised teams, including general psychiatry, diagnostics, bipolar disorders, and psychosis. This allows for both variation and the possibility to develop deeper expertise within specific areas.

The organisation is relatively small, which creates close collaboration between colleagues and shorter decision-making paths in everyday work.

The working environment:
You will join a team with a strong collegial atmosphere, where several doctors have worked for many years. This provides stability, continuity, and a supportive way of working.

Collaboration is central, and you will work closely with nurses, psychologists, and other professionals with a shared focus on patient involvement and long-term care.

Development and future direction

The clinic is currently focusing on strengthening inpatient care, improving acute psychiatric services, and developing mobile psychiatric teams.

At the same time, there is an ongoing effort to create more flexible treatment options beyond traditional inpatient and outpatient care. As a specialist, you will have the opportunity to contribute to these developments in a meaningful way.

What we are looking for:
EU-recognised specialist certification in psychiatry
Experience from both inpatient and outpatient psychiatry
Ability to work independently as well as in a team

Interest in supervision of junior doctors
Motivation to learn Swedish
Good skills in english

Additional information:
On-call duties are included once you are established in the role.
All specialists contribute to the supervision of junior doctors, with structured support available.

Why this opportunity:
This is a setting where you get to know your colleagues, follow your patients over time, and be part of shaping how care is delivered. The region offers a calm environment with easy access to nature, short commutes, and a balanced everyday life.

What we offer:
Ongoing support from a recruiter before, during, and after your employment
Assistance with obtaining Swedish authorization and approvals
Help with accommodation and relocation for you and your family
Access to a free Swedish language course with a private tutor via Teams/ Skype with a flexible schedule
